Canadian Critical Care Trials Group

Centre hospitalier de l'Université de Montréal (CHUM) – Hôpital Notre-Dame  
1560 Sherbrooke St. East, Pavillon Mailloux, 6th floor, Room K-6238  
Montreal, QC H2L 4M1

Dear Colleagues:

On behalf of the Canadian Institutes of Health Research (CIHR), it is with great pleasure that I take this opportunity to congratulate Dr. Paul Hébert and the Canadian Critical Care Trials Group (CCCTG) on its 25th anniversary.

In creating this groundbreaking network focused on integrating research into critical care, the CCCTG has been a pioneer in its field. I am proud to recognize the hard work and dedication of its researchers and health professionals who, through their exemplary spirit of collaboration, have made a significant impact on the quality of care provided to critically ill patients. I am confident that the CCCTG will continue to improve the quality of critical care and, in so doing, save the lives of more people.

The CCCTG plays a central role within Canada's Strategy for Patient-Oriented Research, which aims to ensure that "the right patient receives the right treatment at the right time". Accordingly, CIHR looks forward to working with the CCCTG on advancing its strategic plan, focused on further strengthening research capacity in critical care.

With my best wishes for continued success over the next 25 years,

Alain Beaudet, MD, PhD  
President
